Summary

Experienced DevOps consultant with a strong focus on cloud services and infrastructure automation. Proficient in Terraform, Azure Services, Azure DevOps, and C#, with deep expertise in OAuth and OIDC configurations. Passionate about developing scalable and secure systems, and eager to contribute to dynamic environments leveraging cutting-edge technologies.

Experiences

Netcompany - NLP, Consultant — Ho Chi Minh City, Jan 2023 – present

- Designed and implemented robust Terraform modules for secure, scalable deployments. Reported significant bugs in Azure Portal to Microsoft, contributing to platform improvements.
- Managed resources across multiple Azure subscriptions and applications, ensuring compliance and operational excellence.
- Migrated and optimized repositories from AWS to Azure, leveraging JavaScript/TypeScript for seamless integration.
- Debugged and optimized Azure networking configurations, delivering enhanced performance and stability.
- Reviewed, authored, and recommended Terraform best practices to enhance security and enforce appropriate resource access permissions from the development side.
- Developed and refined Azure DevOps pipeline templates to accelerate CI/CD processes.

Netcompany - Flexdanmark, Consultant — Ho Chi Minh City, June 2022 – Jan 2023

- Configured Keycloak for SSO and OIDC, ensuring secure and seamless user authentication.
- Conducted performance and security testing to enhance system robustness.

Personal Homelab, System Operator — June 2024 – present

- Architected a hybrid cluster network using an old laptop and cloud VMs to create a resilient home server.
- Implemented and managed WireGuard for secure VPN connections between nodes.
- Deployed and maintained Kubernetes clusters using k3s, leveraging Helm for efficient application deployments.

UIT (VNUHCM) - Competitive Programming Contest, System Operator — Ho Chi Minh City, Sept 2019 – Dec 2020

- Configured and maintained contest systems using Docker, Nginx, and PHP for seamless event execution.
- Ensured system reliability under high-demand scenarios.

Certifications

- **AZ900 - Azure Fundamentals** - Microsoft
- **Computational Thinking for Problem Solving** - University of Pennsylvania

Education

BS **University of Information Technology - VNUHCM**, Computer Science — Ho Chi Minh City, Sept 2019 – Nov 2023

- **GPA**: 8.00/10.00

Skills

Programming: Python, JavaScript, TypeScript, C#

Infrastructure as Code (IaC): Terraform

Cloud Platforms: Azure Services

DevOps Tools: Azure DevOps, Jenkins, PowerShell, Bash, Groovy

Cross-functional Collaboration: Proven success in international environments and across time zones.
