Summary

Experienced DevOps consultant with a strong focus on cloud services and infrastructure automation. Proficient in Terraform, Azure Services, Azure DevOps, and Python, with deep expertise in OAuth and OIDC configurations. Passionate about developing scalable and secure systems, and eager to contribute to dynamic environments leveraging cutting-edge technologies.

Experiences

Netcompany - NLP, Consultant — Ho Chi Minh City, Jan 2023 – present

- Designed and implemented Terraform modules for secure, scalable deployments, and authored best practices to enhance security and resource access.
- Managed Azure resources across multiple subscriptions and applications, ensuring compliance and performance optimization.
- Migrated repositories from AWS to Azure, integrating and optimizing with JavaScript/TypeScript.
- Refined Azure networking and developed pipeline templates to streamline CI/CD processes.
- Reported impactful Azure Portal bugs to Microsoft.

Netcompany - Flexdanmark, Consultant — Ho Chi Minh City, June 2022 – Jan 2023

- Configured Keycloak for SSO and OIDC to secure and streamline authentication.
- Conducted system performance testing.

Personal Homelab, System Operator — June 2024 – present

- Built a hybrid cluster using an old laptop and cloud VMs, integrating WireGuard for secure VPN and Kubernetes (k3s) with Helm for efficient deployments.

UIT (VNUHCM) - Competitive Programming Contest, System Operator — Ho Chi Minh City, Sept 2019 – Dec 2020

- Configured and maintained contest systems with Docker, Nginx, and PHP, ensuring reliability during high-demand events.

Certifications

- **AZ900 - Azure Fundamentals** - Microsoft
- **Computational Thinking for Problem Solving** - University of Pennsylvania

Education

BS **University of Information Technology - VNUHCM**, Computer Science — Ho Chi Minh City, Sept 2019 – Nov 2023

- **GPA**: 8.00/10.00

Skills

Programming: Python, JavaScript, TypeScript, C#

Infrastructure as Code (IaC): Terraform

Cloud Platforms: Azure Services

DevOps Tools: Azure DevOps, Jenkins, PowerShell, Bash, Groovy

Cross-functional Collaboration: Proven success in international environments and across time zones.
