## Summary

I have a strong foundation and years of experience with Asynchronous and Parallel Processing in Python, including concepts like Mutex, Arc, and Semaphore. Over the years building such applications, I continuously synthesize practical insights and never hesitate to explore alternative approaches to solving complex problems.

## Experiences

### Netcompany - NLP (Nordea Life & Pension), Consultant

Ho Chi Minh City

Jan 2023 – Feb 2025

- Implemented a Python application to automatically synchronize, analyze, and generate reports using asyncio with semaphores for controlling concurrent tasks.
- Built a custom Azure DevOps Python task to synchronize and validate Azure APIM API configurations across repositories.
- Migrated repositories from AWS to Azure, integrating and optimizing with JavaScript/TypeScript.

### Personal Homelab, System Operator

June 2024 – present

- Designed a pipeline to collect, process, and organize hundreds of gigabytes of text files using Python, Rust, FFMPEG, and GNU Parallel.
- Built a hybrid cluster combining an old laptop and cloud VMs, utilizing WireGuard VPN and deploying services with K3s and Helm.

### Netcompany - Flexdanmark, Consultant

Ho Chi Minh City

June 2022 – Jan 2023

- Developed a Python application to scan documents and assist in generating accurate authentication system configurations.
- Configured Keycloak for SSO and OIDC integration with multiple identity providers and hundreds of user roles.
- Performed system performance testing and tuning.

## Certifications

- **AZ900 - Azure Fundamentals** - Microsoft
- **Computational Thinking for Problem Solving** - University of Pennsylvania

## Education

### BS University of Information Technology - VNUHCM, Computer Science

Ho Chi Minh City

- **GPA:** 8.00/10.00

Sept 2019 – Nov 2023

## Skills

**Programming:** Python, JavaScript, TypeScript, C#

**Infrastructure as Code (IaC):** Terraform

**Cloud & DevOps:** Azure, Azure DevOps, Jenkins, PowerShell, Bash, Groovy

**Collaboration:** Experienced in international and cross-time-zone environments.
