Summary

I spent days setting up my Arch Linux-powered workstation, not just for productivity but because I genuinely enjoy the process. On this system, I create elegant floral designs using the Desmos graphing tool, blending creativity with precision. As an experienced DevOps consultant, I bring the same passion for detail and optimization to my work, with a strong focus on cloud services and infrastructure automation. Proficient in Terraform, Azure Services, Azure DevOps, and Python, I also have deep expertise in OAuth and OIDC configurations.

Experiences

Netcompany - NLP, Consultant — Ho Chi Minh City, Jan 2023 – present

- Designed and implemented Terraform modules for secure, scalable deployments, and authored best practices to enhance security and resource access.
- Managed Azure resources across multiple subscriptions and applications, leveraging Azure Landing Zone architecture to ensure compliance, standardization, and performance optimization.
- Migrated repositories from AWS to Azure, integrating and optimizing with JavaScript/TypeScript.
- Refined Azure networking and developed pipeline templates to streamline CI/CD processes.
- Reported impactful Azure Portal bugs to Microsoft.

Netcompany - Flexdanmark, Consultant — Ho Chi Minh City, June 2022 – Jan 2023

- Configured Keycloak for SSO and OIDC to secure and streamline authentication.
- Conducted system performance testing.

Personal Homelab, System Operator — June 2024 – present

- Built a hybrid cluster using an old laptop and cloud VMs, integrating WireGuard for secure VPN and Kubernetes (k3s) with Helm for efficient deployments.

UIT (VNUHCM) - Competitive Programming Contest, System Operator — Ho Chi Minh City, Sept 2019 – Dec 2020

- Configured and maintained contest systems with Docker, Nginx, and PHP, ensuring reliability during high-demand events.

Certifications

- **AZ900 - Azure Fundamentals** - Microsoft
- **Computational Thinking for Problem Solving** - University of Pennsylvania

Education

BS **University of Information Technology - VNUHCM**, Computer Science — Ho Chi Minh City, Sept 2019 – Nov 2023

- **GPA**: 8.00/10.00

Skills

Programming: Python, JavaScript, TypeScript, C#

Infrastructure as Code (IaC): Terraform

Cloud Platforms: Azure Services

DevOps Tools: Azure DevOps, Jenkins, PowerShell, Bash, Groovy

Cross-functional Collaboration: Proven success in international environments and across time zones.

Side Projects

Lissajous Curve | Richard Feynman's Ellipse | Scheduling Algorithms | Page Replacement Algorithms |
